WORK EXPERIENCE

TED Optimus

UI/UX Designer

July 2025 - October 2025

- Carried out research on the stock market by gathering reports from various brokers.
- Managed huge volumes of financial data with Microsoft Excel to make the information more accessible and easy to analyze.
- Created and fixed bugs in Python scripts within the Google Colab environment to simplify the process of gathering data.
- Classified and stored reports issued by various brokers to help with market trend analysis.
- Utilized Microsoft Excel capabilities like formulas, PivotTables, and shortcuts to boost productivity and accuracy.
- Aided in the configuration of audio equipment for better communication during meetings and presentations.
- Worked in a fintech setting with the Research Team and enhanced my problem-solving, collaboration, and communication skills

Fei Fan Hotpot

Service Crew

February 2023 - July 2023

- Worked collaboratively with team members to provide efficient and friendly customer service in a fast-paced environment.
- Ensured high standards of kitchen and personal hygiene to maintain food safety and customer satisfaction.
- Assisted customers by resolving inquiries and handling issues professionally during peak business hours.
- Developed strong time management, communication, and problem-solving skills while working under pressure.
- Gained valuable experience in hospitality, customer service, teamwork, and maintaining a strong work ethic.

EDUCATION

Asia Pacific University of Innovation and Technology

Bachelor of Science (Hons) in Software Engineering - 3.4 GPA

Diploma in Information & Communication Technology - 2.89 GPA

November 2025

PROJECT

ThinkZap (HTML/PHP)

Winter 2024

- Developed a online quiz platform for students and lecturer with Microsoft Visual Studio

DQuiz (Python)

Summer 2025

- Developed a gamified Learning Management System (LMS) as part of a team, contributing to system analysis, UI/UX design, documentation, and feature development.

Assessment Feedback System

Spring 2026

- Designed and implemented a Java-based Assessment Feedback System (AFS) with role-based access and CRUD operations for administrators, academic leaders, lecturers, and students.
